Dear \_\_\_\_\_ :

**RE: Video Inspection Certification – *Project name***

This is to certify that the sewer system has been video tested and meets the District's criteria. We verify that all sewer systems were thoroughly cleaned/flushed prior to video testing.

Attached is a summary of problems found during testing, together with our recommendations and details of action taken to correct deficiencies. Applicable areas were re-videoed as noted. Enclosed is the CD video inspection report details and photos of this project.

We therefore recommend that the District accept the sewer system.

Yours truly,

*Consulting Engineering Firm*
